UFB – class: (only in size 400 u. 500)

Ideal for standard thermal applications at an excellent price / performance ratio. Integral digital timer from 1 min. to 99 h 59 min. Double over temperature protection. Temperature: +30°C to +220°C

UFE – class:

Fuzzy supported PID microprocessor controller. 7-day program timer with real time clock. Triple over temperature protection. Fan speed control in 10 % steps. Long term documentation of all relevant data via ring store. Serial interface RS232 incl. Software. Temperature: +30°C to +250°C (option 300°C, extra charge)

UFP – class:

Perfect performance for thermal processes. Adaptive, fuzzy supported multifunctional microprocessor PID controller. Visualisation of operation sequence with additional selection of language via set-up for alphanumeric display. Parallel printer interface. Integral programme timer for 40 variable ramps, each 1 min. up to 999 hours. MEMory Card... Temperature: +30°C to +250°C (option 300°C, extra charge)

General technical data and price:
